Massive technological change has been impacting universities and university libraries in recent years. Such change has manifested in technological developments including information technologies and communications technology. These trends are having a profound impact on academic libraries, including impacts on library staff and users, roles and responsibilities, and skills and capabilities. The book takes an international perspective on the massive change that has been occurring in academic libraries and provides a number of case studies of libraries that have been affected by these changes, including case studies of technological change and future change, and provides information on further reading. Case studies describe the rationale, aims, and objectives for particular technological innovations, and consider methods, outcomes, and recommendations for the future. Finally, the book reflects back on how technological change can be best wrought in the academic library, offering an international perspective on technological innovation in the academic Library.
The Twenty-First Century Art Librarian - Terrie Wilson - 2010-10-24

Meet the challenge of operating a successful art library! The Twenty-First Century Art Librarian examines the unique challenges and vital professional issues that are at the forefront of current art librarianship, providing both contemporary theory and practical advice to new art librarians and library professionals in libraries of all sizes. Proactive Marketing for the New and Experienced Library Director - Melissa U-D. Goldsmith - 2014-08-26

Academic libraries have continually sought technological solutions to low circulation statistics, under-aged by students and faculty, and what is perceived as a crisis in relevance, seeing themselves in competition with Google and Wikipedia. Academic libraries, however, are as relevant as they have been historically, as their primary functions within their university missions have not changed, but merely evolved. Going beyond the Gate Count argues that the problem is not relevance, but rather performance. This book will help directors and librarians find new and fresh ways to provide the services and resources their students use.

Electronic environment--findings of a survey on the form and function models within regional campus libraries comparison between (ARL/ACRL) SPEC Kit data and a survey of public libraries as well as academic libraries. This book provides data and evidence for both researchers and librarians and provides current examples of innovative uses of e-books in academic contexts. This book reviews the current situation in e-book services and applications for libraries in the context of the variety of purchase models and formats available, and the lack of standardization. It discusses solutions for providing access and maintaining bibliographic control, looks at various initiatives to promote and publicize e-books, and compares e-book usage surveys to track changes in user preferences and behaviour over the last decade. E-books have already had a huge impact on academic libraries, and the book concludes with reflections on the future of e-books in academic libraries. Describes how e-books have changed library services and how they have enabled academic libraries to align with the needs of the user. The book discusses problems with e-book collection development and management and lists examples of solutions. Examines trends in user behaviour and acceptance of e-books.

The Strategic Stewardship of Cultural Resources: To Preserve and Protect examines the FBI's Art Theft Program, national and institutional requirements for other major libraries preservation—protection from deterioration through conservation and reformatting, using examples from the National Endowment for the Humanities, the Library of Congress, and other institutions bibliographic control—knowing what your library has inventory control—knowing where your collections are The Strategic Stewardship of Cultural Resources identifies the risks involved in preserving cultural resources and presents effective strategies for security. The book guides you through the process of evaluating preservation and security programs, budgeting decisions, determining the right amount of facilities security, meeting the challenges of preserving digital information, and coping with the negative effects of theft and vandalism. The Strategic Stewardship of Cultural Resources focuses on four key areas that are critical to safeguarding your resources: hardware and software, networking, and the library's digital resources. This book provides practical strategies and recommendations for librarians and other campus librarians, including tips on how to protect digital content from theft and damage, and suggestions for incorporating digital content into your library's mission and strategic plan. The book also includes case studies and best practices from other libraries around the country, providing insights into successful strategies for managing electronic content in the evolving modern library. This book will help you prepare for a future in which electronic access improves the range, speed, and quality of your services for patrons and resource-sharing partners.

E-books in Academic Libraries - Maria-Carme Torras - 2016-12-08

The aim of this book is to professionalise the educational role of academic libraries. It helps information professionals design and carry out information literacy education programmes. The book puts forward a process-oriented approach to information literacy user education. Practical ways are outlined in which librarians' pedagogical approaches can be facilitated while the information literacy users are empowered with two generic, situationally founded and independent choices in their teaching and supervisory practices as well as critically reflecting on them. Examples of best and less good practice are shown upon to provide scenarios for reflection which can enrich the information professional's work. Provides the information professional with a practical framework to get started on a new user education programme for information literacy or to redesign an existing one. It's forward a model of user education which contextualises information search and use within the framework of academic writing helps the academic library, as a professional community, to build up a common internal language.
