PROJECT AND PROGRAMME EVALUATIONS Guidelines | 1 Evaluation: The systematic and objective assessment of an on-going or completed project or programme, its design, implementation and results. The aim is to determine the relevance and fulfillment of objectives, development efficiency,

Develop programme theory / theory of - Better Evaluation

A programme theory explains how an intervention (a project, a programme, a policy, a strategy) is understood to contribute to a chain of results that produce the intended or actual impacts. It can include positive impacts (which are beneficial) and negative impacts (which are detrimental).

Evaluation Criteria - OECD

Data & research on evaluation of development programmes inc. Paris declaration, budget support, multilateral effectiveness, impact evaluation, joint evaluations, governance, aid for trade. The OECD DAC Network on Development Evaluation (EvalNet) has defined six evaluation criteria – relevance, coherence, effectiveness, efficiency, impact and sustainability – and two principles for their use.

Six steps in quality intervention development (6SQuID)

Introduction. Improving the effectiveness of public health interventions depends as much on improving their design as their evaluation.1 Yet, compared to the vast literature on intervention evaluation,2-5 there is little to guide researchers or practitioners on developing interventions in logical, evidence-based ways to maximise effectiveness. Poor intervention design can waste public resources needed to put into the effort, assumptions they make

Types of intervention and their development - Field Trials

2. Types of intervention. Interventions can be classified into two broad categories: (1) preventive interventions are those that prevent disease from occurring and thus reduce the incidence (new cases) of disease, and (2) therapeutic interventions are those that treat, mitigate, or postpone the effects of disease, once it is under way, and thus reduce the case fatality rate or reduce the

Logic Models - Program Development and Evaluation

Logic Models are a popular tool that can be used to help conceptualize your change effort. It does this by inviting the author(s) to articulate their understanding of the current situation, the changes they hope to bring about through their program effort, with and/or whom, the activities planned to contribute toward this change, the resources needed to put into the effort, assumptions they

Concerned About Your Child's Development? | CDC

Jul 28, 2021 · At the same time as you ask the doctor for a referral to a specialist, call your state's public early childhood system to request a free evaluation to find out if your child qualifies for intervention services. This is sometimes called a Child Find evaluation. You do not need to wait for a doctor’s referral or a medical diagnosis to make

Evaluating Capacity Development | Better Evaluation

Unlike programs supporting health, livelihoods, and other impact areas, capacity development does not have stand-alone outcomes. Instead, capacity development supports a diverse set of goals in different sectors, at different levels, through different activities. Capacity development consequently presents multiple monitoring and evaluation opportunities and challenges for practitioners.

Integrated Guided Missile Development Programme - Wikipedia

The Integrated Guided Missile Development Programme (IGMDP) was an Indian Ministry of Defence programme for the research and development of the comprehensive range of missiles. The programme was managed by the Defence Research and Development Organisation (DRDO) and Ordnance Factories Board in partnership with other Indian government political organisations.

Early Intervention - NYC Health

Early Intervention - NYC Health

Alternative development (AD) is a recent development paradigm and the term "alternative" is used to distinguish this kind of development from the traditional development paradigm.

A Manual on Monitoring and Evaluation for Alternative Development, published by the World Bank, provides a comprehensive guide to monitoring and evaluation of AD projects in their own country. The manual includes practical guidance on how to design and implement monitoring and evaluation systems, as well as examples from various countries.

The Efficacy and Mechanism Evaluation (EME) Programme funds ambitious studies evaluating interventions with the potential to make a step-change in the promotion of health, treatment of disease and improvement of rehabilitation or long-term care.

The UN Capital Development Fund makes public and private finance work for the poor in the world's 47 least developed countries (LDCs). UNCDF offers "last mile" finance models that unlock public and private resources, especially at the domestic level, to reduce poverty and support local economic development.
