The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization, yet China is a continent-sized economy and society with substantial diversity across its different regions. This means that its engagement with the global economy cannot just be understood at the national level, but requires analysis of the differences in participation in the global economy across China's regions. This book responds to this challenge by focusing on the political economy of Northern Regional Development. This book should be of interest to students and researchers of Urban Studies and Planning, Regional Studies and Economics, as well as Sociology and Geography.

Globalization, Regionalization and Cross-Border Regions: M. Pechlaner - 2012-01-13

This volume highlights ongoing changes in the political economy of small cities in relation to the field of culture and leisure. Culture and leisure are focal points both to local entrepreneurship and to planning by city governments, which means that these developments are subject to market dynamics as well as political discourse and action. Public-private partnerships as well as conflicts of interests characterise the field, and a major issue related to the strategic development of these fields is the question of how to control the benefits and costs of cultural and leisure activities for local governments.

This book focuses on the political economy of the cities in the US and the European Union, especially the implications of the denationalization of the regions and the denationalization of the economy. It discusses the following themes: (1) the vector of the nation are diminishing as the national economy is becoming more integrated into the global economy; (2) the various steps that the national economy is taking to become integrated into the global economy; (3) the institutional framework that is being developed to facilitate the integration of the national economy into the global economy; and (4) the role of the national government in facilitating the integration of the national economy into the global economy.

Captive Cities: Welfare, Nationalism, and the State: Peter Mathias - 2012-10-25

This book deals with the implications of regionalism in terms of the introduction of domestic reforms in Asian countries before discussing the possible formation of a region-wide economic community. The eight chapters of the book are based on respective empirical studies of the countries mentioned in the title, and the conclusions of each chapter are drawn from a comparative perspective. The book contributes to the theoretical and empirical literature on Asian regionalism, with a focus on the innovations needed to reform the current institutional architecture in Asia.

The Political Economy of Inequality: Anne Lorentzen - 2012-02-13

Why do some nations and cities attain high levels of economic and social prosperity? What makes them so successful? The kinds of factors habitually cited in answer to these questions explain why nations improve their economic and social development. This book explores the economic logic and political meaning of these developments, with special reference to a reconceptualization of the ‘New World Order’ to the ongoing theoretical debates about democracy, the market, the state and multilateralism.

This multi-authored book looks at one of the most dynamic regions of the Third World within the context of the rapidly changing international system of the 1990s. Among the many themes it explores are ASEAN's new political roles and new economic opportunities, the development of the ASEAN economic region, the impact of ASEAN on the international economic system, the role of ASEAN in regional economic integration, and the implications of ASEAN for the international economic system.

Three trends have dominated the political economy of integration during the last two decades: globalization, economic nationalism, and regionalization. This book explores comparative regional integration, focusing on both intra-regional and extra-regional integration. It argues that for the changing world order, the development of transregionalism would have benign implications on the global level.

This book compares existing approaches to regionalization and transregionalization and discusses its global impact on social and political economy. It argues that for the changing world order, the development of transregionalism would have important implications for the world economy.
