By presenting a systematic critique and counter-proposal, Harland challenges the very foundation of recent literary and language based theory.

Beyond Superstructuralism - Richard Harland - 2003-09-02
Moving on from his previous book, Superstructuralism, Richard Harland argues that the focus on single words in the structuralist theory of language is its key weakness and that the next advance beyond post-structuralism depends upon replacing word-based with syntagm-based theories. In a lucid way he develops a new syntagmatic theory which shows that the effect of combining words grammatically can transform the very nature of meaning. Translation in Law - Giuseppe Zaccaria - 2000
"The 2000 issue of the Yearbook deals with the concept of translation. From the perspectives of philosophy of language, theology, comparative law and jurisprudence, such a notion is here addressed both in itself and in its many-sided relationships with the concept of interpretation. Schwerpunkt von Ars Interpretandi 2000 ist das Problem der Übersetzung. Aus den Perspektiven von Sprachphilosophie, Theologie, Vergleichsrecht und Rechtstheorie wird dieser Begriff sowohl in sich selbst als auch in seinen mehrseitigen Zusammenhang mit Auslegung untersucht. Post-Structuralism and the Question of History - Derek Attridge - 1989-05-11
This collection of essays focuses on the relation between post-structuralist and historical literary theory.

Madan Sarup has now revised his accessible and popular introduction to post-structuralist and postmodern theory. A new introductory section discusses the meaning of such concepts as modernity, postmodernity, modernization, modernism, and postmodernism. A section on feminist criticism of Lacan and Foucault has been added, together with a new
reading for those who want a clear and incisive introduction to the theories of postmodernism and post-structuralism. The chapter on postmodernism has been significantly expanded to include a discussion of Lyotard’s language games and his use of the category "sublime." This chapter ends with a discussion of the relationship between feminism and postmodernism. A further chapter has been added on the work of Jean Baudrillard, a cult figure on the current postmodernist scene, whose ideas have attained a wide currency. The chapter includes a new section on postmodern cultural practices as revealed in architecture, TV, video, and film. Suggestions for further reading are now listed at the end of each chapter and are upgraded and annotated. In tracing the impact of post-structuralist thought not only on literary criticism but on such disciplines as philosophy, politics, psychoanalysis, the social sciences, and art, this book will be essential for those who want a clear and incisive introduction to the theories that continue to have widespread influence.

Poststructuralism and Educational Research - Peters - 2004-10-26
Poststructuralism, and its implications for something called "postmodernism," is a major topic of discussion in social theory and research generally, including educational research. The works of the major authors in this tradition (Foucault, Lyotard, Cixous, Derrida, Haraway, to name a few) are challenging and difficult. Yet more and more theorists and researchers in educational scholarship use this term to describe their work. What does poststructuralism mean for these authors, and what significance does it have for educational inquiry? This book takes on these central questions and explores the impact of poststructuralism in language that makes the basic issues at stake accessible for a broad readership. Michael Peters and Nicholas C. Burbules highlight the implications of a poststructuralist stance for the conception of the research subject and examine its standards of validity and methods of investigation. They also lay out the distinguishing characteristics of this approach to educational inquiry, using as examples the particular ways in which writers (including Giroux, McLaren, Lather, and Ball) have tried to incorporate the poststructuralist perspective into their investigations of educational issues. The emphasis throughout this book will be on making these complex theoretical issues tangible and salient for the educational researcher.

The Reading of Theoretical Texts - Peter Ekegren - 2002-01-04
Since the structuralist debates of the 1970s the field of textual analysis has
largely remained the preserve of literary theorists. Social scientists, while
accepting that observation is theory laden have tended to take the meaning
of texts as given and to explain differences of interpretation either in terms
of ignorance or bias. In this important contribution to methodological
debate, Peter Ekegren uses developments within literary criticism,
philosophy and critical theory to reclaim this study for the social sciences
and to illuminate the ways in which different readings of a single text are
created and defended.

Contemporary Continental Philosophy - Stuart Sim - 2017-08-03
This title was first published in 2000. Contemporary continental philosophy
is a widely-used, but in many ways a highly problematic, term and its exact
frame of reference is not always clear. In its more recent French
manifestations in particular, it continues to arouse considerable controversy
and create bitter divisions, with particularly hostile reactions to the work of
Derrida and others. Much work in the recent continental tradition can be
fitted into a longer-running philosophical tradition of scepticism, and
scepticism has always had the power to provoke and unsettle the
philosophical establishment. Presenting an overview of the philosophical
landscape of the continental tradition since the 1940s, this book traces the
establishment of the new, super-scepticism as an intellectual paradigm with
the power to threaten and disorientate existing world-views and more
traditional styles of philosophical discourse - marking the continental divide.
Exploring how contemporary continental philosophy from existentialism to
postmodernism can be characterised as this new, more resistant form of
scepticism, Sim identifies a clutch of key themes - including "difference",
"the subject", "antifoundationalism", "dialectics" - which have been
obsessively worked over by key thinkers in the Existentialist-Postmodernist

Presenting a new theme-led approach to provide an entry into current debates in continental philosophy, Stuart Sim reintegrates the work of Sartre into the more recent continental tradition, and suggests that something qualitatively different is now occurring in French philosophy.

**The Moment of Complexity** - Mark C. Taylor - 2003-09
We live in a moment of unprecedented complexity, an era in which change occurs faster than our ability to comprehend it. With "The Moment of Complexity", Mark C. Taylor offers a map for the unfamiliar terrain opening in our midst, unfolding an original philosophy of our time through a remarkable synthesis of science and culture. According to Taylor, complexity is not just a breakthrough scientific concept but the defining quality of the post-Cold War era. The flux of digital currents swirling around us, he argues, has created a new network culture with its own distinctive logic and dynamic.

**Experiencing the Postmetaphysical Self** - Fionola Meredith - 2004-12-14
This book charts and challenges the bruising impact of post-Saussurean thought on the categories of experience and self-presence. It attempts a reappropriation of the category of lived experience in dialogue with poststructuralist thinking. Following the insight that mediated subjectivity need not mean alienated selfhood, Meredith forwards a postmetaphysical model of the experiential based on the interpenetration of poststructuralist thinking and hermeneutic phenomenology. Since poststructuralist approaches in feminist theory have often placed women's lived experiences 'under erasure', Meredith uses this hermeneutic/deconstructive model to attempt a rehabilitation of the singular 'flesh and blood' female existent.

**Rhetoric and Philosophy** - Richard A. Cherwitz - 2014-06-03
This important volume explores alternative ways in which those involved in the field of speech communication have attempted to find a philosophical grounding for rhetoric. Recognizing that rhetoric can be supported in a wide variety of ways, this text examines eight different philosophies of rhetoric: realism, relativism, rationalism, idealism, materialism, existentialism, deconstructionism, and pragmatism. The value of this book lies in its pluralistic and comparative approach to rhetorical theory. Although rhetoric may be the more difficult road to philosophy, the fact that it is being traversed by a group of authors largely from speech communication demonstrates important growth in this field. Ultimately, there is recognition that if different thinkers can have solid reasons to adhere to disparate philosophies, serious communication problems can be eliminated. Rhetoric and Philosophy will assist scholars in choosing from among the many philosophical starting places for rhetoric.

The use of the word 'structuralism', not only as a title for the present book but also as a valuable indication for outstanding philosophical and cultural developments of our century, may embarrass the English reader. The same might be the case regarding some of the philosophical thoughts developed in connexion with this structuralism. Emphasis is namely not on a set of technical operations using ideas and conceptions closely linked up with 'structural' or 'systematical' analyses, system and in formation theories, biology, psychology and even literary criticism. On the contrary, the concept of structuralism here definitely refers to a holistic approach, not unlike existentialism or phenomenology. Many philosophical implications of this structuralism are however quite different from those contained in existential philosophies. The first difference applies to philosophy itself: no existential thinker will doubt or deny that the thoughts developed are genuine philosophical thoughts. Structuralism however does not take that decision before hand, and thus no longer restricts itself to the traditionallaws and habits of philosophical reasoning. It presents itself on the one hand as a holistic attempt to interpret reality among lines of philosophical argumentation, but t ries to do so without the decision that this argumentation leads to philoso phy. Structuralism therefore presents itself as a specific activity, a modus operandi in reality itself.

Deleuze and Spinoza - G. Howie - 2002-05-15
Expressionism, Deleuze's philosophical commentary on Spinoza, is a critically important work because its conclusions provide the foundations for Deleuze's later metaphysical speculations on the nature of power, the body, difference and singularities. Deleuze and Spinoza is the first book to examine Deleuze's philosophical assessment of Spinoza and appraise his arguments concerning the Absolute, the philosophy of mind, epistemology and moral and political philosophy. The author respects and disagrees with Deleuze the philosopher and suggests that his arguments not only lead to eliminativism and an Hobbesian politics but that they also cast a mystifying spell.

Jacques Derrida (Routledge Revivals) - William Schultz - 2016-06-17

First published in 1992, this book represents the first major attempt to compile a bibliography of Derrida's work and scholarship about his work. It attempts to be comprehensive rather than selective, listing primary and secondary works from the year of Derrida's Master's thesis in 1954 up until 1991, and is extensively annotated. It arranges under article type a huge number of works from scholars across numerous fields — reflecting the interdisciplinary and controversial nature of Deconstruction. The substantial introduction and annotations also make this bibliography, in part, a critical guide and as such will make a highly useful reference tool for those studying his philosophy.

Platonism, Music and the Listener's Share - Christopher Norris - 2006-10-09

What is a musical work? What are its identity-conditions and the standards (if any) that they set for a competent, intelligent, and musically perceptive act of performance or audition? Should the work-concept henceforth be dissolved as some New Musicologists would have it into the various, ever-changing socio-cultural or ideological contexts that make up its reception-history to date? Can music be thought of as possessing certain attributes, structural features, or intrinsically valuable qualities that are response-transcendent, i.e., that might always elude or surpass the best state of (current or future) informed opinion? These are some of the questions that Christopher Norris addresses by way of a sustained critical engagement with the New Musicology and other debates in recent philosophy of music. His book puts the case for a qualified Platonist approach that would respect the relative autonomy of musical works as objects of more or less adequate understanding, appreciation, and evaluative judgement. At the same time this approach would leave room for listeners share the phenomenology of musical experience in so far as those works necessarily depend for their repeated realisation from one performance or audition to the next upon certain subjectively salient modalities of human perceptual and cognitive response. Norris argues for a more philosophically and musically informed treatment of these issues that combines the best insights of the analytic and the continental traditions. Perhaps the most distinctive feature of Norris's book, true to this dual orientation, is its way of raising such issues through a constant appeal to the vivid actuality of music as a challenge to philosophic
within the host community. It discusses how the gaze is constructed, how it

Most tourism theories have been developed from the tourists' perspective,
including the seminal work by John Urry, "The Tourist Gaze", which is now
a classic text. "The Host Gaze in Global Tourism" is a unique book for
researchers and students as it is the first to look at the host gaze from
within the host community. It discusses how the gaze is constructed, how it
has developed, how it varies between countries and how the tourism
industry can affect it. By looking at the gazes of both Western and non-
Western hosts, this book analyses the dynamics of a host destination and

**Badiou's 'Being and Event'** - Christopher Norris - 2009-05-24
Alain Badiou's Being and Event is the most original and significant work of
French philosophy to have appeared in recent decades. It is the magnum
opus of a thinker who is widely considered to have re-shaped the character
and set new terms for the future development of philosophy in France and
elsewhere. This book has been written very much with a view to clarifying
Badiou's complex and demanding work for non-specialist readers. It offers
guidance on philosophical and intellectual context, key themes, reading the
text, reception and influence; and further reading.
A Christian Approach to Interdisciplinary Studies - William Dennison - 2007-05-01
In an academic world that has rejected a Christian ontology, metaphysic, and epistemology, as well as the secular foundationalism of modernity, one is hard-pressed to find any secular academician in the field of interdisciplinary studies (IDS) advocating a definitive starting point and methodology for IDS. In A Christian Approach to Interdisciplinary Studies, William D. Dennison asks, is such a study truly integrative that does not have an ontological, integrative starting point and the constitutive component of method? To put the question another way, without the God of the Bible as the author of integration within creation, can there truly be IDS? Indeed, Dennison calls for the integration of approach and method, integration provided and modeled by the triune God of Scripture. Adapted from the Preface

Lacan: A Genealogy - Miguel de Beistegui - 2021-04-08
Lacan: A Genealogy provides a genealogical account of Lacan's work as a whole, from his early writings on paranoid psychosis to his later work on the real and surplus enjoyment. Beistegui argues that Lacan's work requires an in-depth genealogy to chart and interpret the his key concept of desire. The genealogy is both a historical and critical approach, inspired by Foucault, which consists in asking how – that is, by what theoretical and practical transformations, by the emergence of which discourses of truth, which institutions, and which power relations – our current subjectivity was shaped. Desire is a crucial thread throughout because it lies at the heart not only of liberal political economy, psychiatry and psychopathology, and the various discourses of recognition (from philosophy to psychology and the law) that shape our current politics of identity, but also, and more importantly, of the manner in which we understand, experience and indeed govern ourselves, ethically and politically. A novel reading of Lacan that foregrounds the radicality and urgency of his concepts and the relationship between desire, norm and the law.
